

External Exhaust Valve

For Sentinel C-20, B-21, I-21 and F-21 Instruments

APPLICATION BULLETIN #138

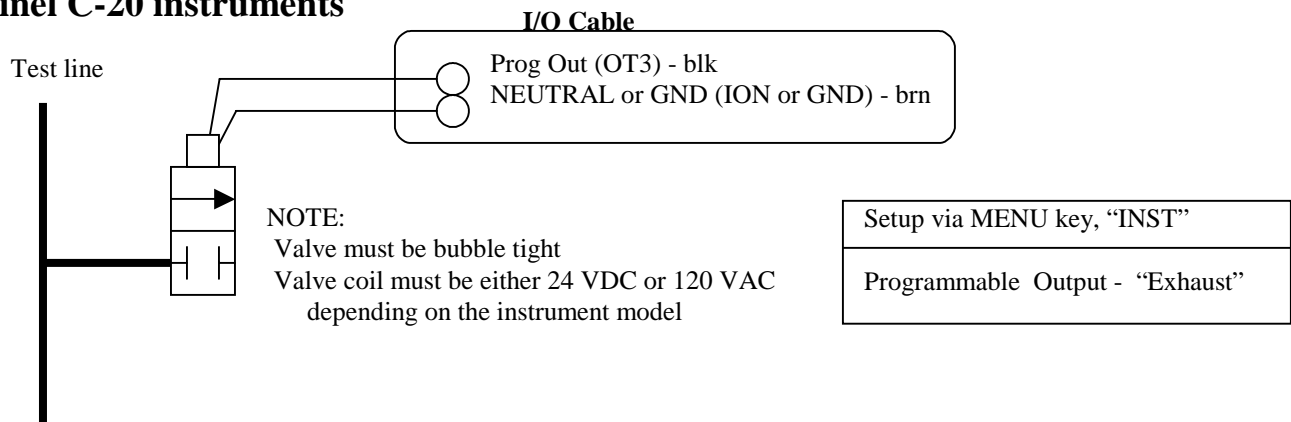

October, 2002

For some applications it is desirable to utilize an external exhaust valve to:

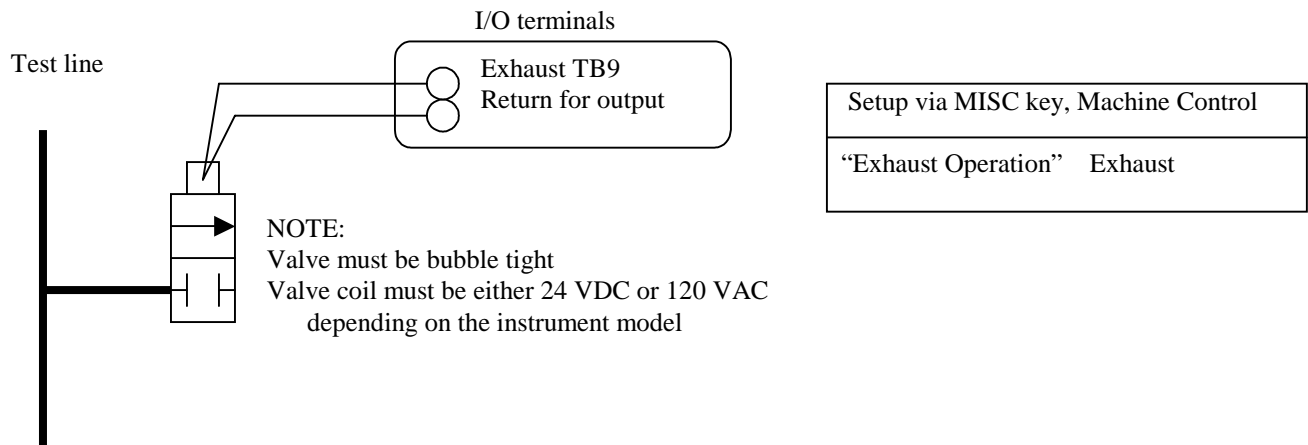

- Minimize part contamination from reaching the instrument's internal pneumatics after testing
- Quickly release the pressure from the part after test

The Sentinel instruments have outputs that can be setup for this function.

Sentinel C-20 instruments

Sentinel B-21, I-21 and F-21 instruments
